ACLJ will do the final formatting of your paper. If your paper is intended for a conference, please observe the conference page limits.

The introduction should be clear and provide the issue to be discussed in the manuscript. Before the objective, authors should provide an adequate background, and very short literature survey in order to record the existing solutions, to show which is the best of previous researches, to show the necessary to add methodology in General Review type of paper.

## II. Methodology

The method is optional for original research articles. This method is written in descriptive and should provide a statement regarding the methodology of the research. This method as much as possible to give an idea to the reader through the methods used. This Method is optional, only for original research articles. It is not necessary to add methodology in General Review type of paper.

## III. Results and Discussion

This section is the most important section of your article. The analysis or results of the research should be clear and concise. The results should summarize (scientific) findings rather than providing data in great detail. Please highlight differences between your results or findings and the previous publications by other researchers.

### **The subheading of The Analysis and Results**

Following the main headings should be bold and underlined texts.

### ***Sub-Subheading of the Analysis and Results***

Following subheadings should be bold and italic.

Tables and Figures are presented center and cited in the manuscript. The figures should be readable and at least have a resolution of 300 DPI (Dots Per Inch) for excellent printing quality. Table made with the open model (without the vertical lines) as shown below:
