

Title	Page
Muhammad Husaini ¹⁾ , Elfi Anis Saati ²⁾ , and Desiana Nuriza Putri ²⁾ *	4-15
Study of utilization three varieties of mango and concentration of apple vinegar towards physicochemical characteristics of mango chutney	
Sri Winarsih*	16-21
The Effect of NaOH Concentration and microwave exposure time to the content of cellulose, hemicellulose and lignin of Corn Cob	
Yuliarie Wulandari ¹⁾ , Noor Harini ²⁾ *, Warkoyo ²⁾	22-32
Characterization of Edible Film from Starch of Taro (<i>Colocasia esculenta</i> (L.) Schott) with Addition of Chitosan on Dodol Substituted Seaweed (<i>Eucheuma cottonii</i> L.)	
Yovy Ermawati ¹⁾ , Noor Harini ²⁾ , and Sri Winarsih ²⁾ *	33-38
The Characteristic of Porang Flour (<i>Amorphophallus muelleri</i> Blume) Purification Use Ethanol and The Application as Subtitution Agent on Chicken Sausage	
Okta Pringga Pakpahan ^{1*} , Kenji Hosono ²⁾ , and Hiroyuki Nakaki ²⁾	39-51
Assessment organic production of kyuri farms focuses on microbiological contamination with good agricultural practices (GAP) standard criteria.	
Vritta Amroini Wahyudi ^{1*)} , Afifah Nuril Aini ²⁾ , Dian Puspita ²⁾ , Ayu Ramadhanni Kumala Dewi ³⁾	52-61
Uji Aktivitas Antioksidan Fraksi Etil Asetat Daun Salam (<i>Syzygium Polyanthum</i>) Dan Uji Bilangan Peroksida-Nya Terhadap Minyak Goreng Curah	
Desiana Nuriza Putri ¹⁾ , Citra Anggita ^{2*)} , Siska Cahyanti ²⁾ , dan Saskia Agnes Monica ²⁾	62-70
Oleoresin Rimpang Jahe Emprit Pada <i>Edible Coating</i> Sebagai Antibakteri Pada Bakso Daging Sapi	
Devi Dwi Siskawardani, Rias Anggun Kartika, Warkoyo, and Khusnul Khotimah	71 - 80
The study of watermelon rind (<i>Citrullus lanatus</i>) and pineapple fruit (<i>Ananas comosus</i> L.) proportion with carrageenan addition on fruit leather physicochemical characteristics
